PROJECTS/FREELANCE WORK

TENDER

Invoice/Payroll App

A payroll and invoicing app built for a small logistics company which allows managers to add, save and edit new employees, as well as create, calculate and edit new paychecks then export or print with just 2 clicks. Created with React, MongoDB, Express, Node. Javascript, Google Auth. Created and used Tender template to build this payroll app for two other small businesses.

CREATIVE CONNX

Social Media Network

Database created for Creative Freedom Co. where users sign-up, edit and delete their profile. As well as create posts, upload photos, videos, music and add comments. Created with React, Javascript, Python, Django and SQL.

PICLIST

Employee Management Database

Managers can keep track of their staff photographers' schedules and create, update and delete profiles, events and equipment. Created with Handlebars, Javascript, MongoDB, Express and Node.

MAJOR KEYS

Web/Mobile Javascript Games

Users answer various trivia questions to advance an animated character closer to obtaining DJ Khaled's "Major Keys" to success. Includes a DJ Khaled Memory Game with nonstop combinations. Created with HTML, CSS, Javascript, JQuery and PhoneGap.

SCENEIT PICTURES

Interactive Website

Besides stellar photos, this site includes an interactive camera that randomly switches photos shown on the page's gallery as a polaroid picture. Created with HTML, CSS, Javascript and JQuery.
